RUAG completes 72-month inspection on Dornier 228 0

BY KIRSTIE PICKERING ON 10TH DECEMBER 2019

COMPLETION, REFINISHMENT & MAINTENANCE

RUAG MRO International, the OEM of the Dornier 228, has completed a 72-month inspection on Bangladesh Navy's (BN) Dornier 228-212 special-mission aircraft.

The MRO event was fulfilled on time and within budget at the OEM's aircraft production facilities in Oberpfaffenhofen, Germany.

The aircraft has now resumed regular operations. In a special arrangement, RUAG MRO International's technical specialists welcomed BN maintenance technicians, enabling additional training intended to expand the BN team's work experience.

"We are pleased to welcome back our Dornier 228 after this successful heavy inspection and have already deployed it to continue our mission of surveillance and patrol flights in the protection of our sovereign waters," said Commodore Zahir, director of purchase at BN. "We are also proud to welcome back our Overseas Team from their opportunity on the ground at RUAG's production centre."

Michael Franz, director customer support for Dornier 228 at RUAG MRO International, commented, "As the Dornier 228 OEM, our expertise includes supporting our customers in every way possible, like this 72-month inspection for Bangladesh Navy. We offer these MRO services with this unique OEM advantage. As we continue to fulfil heavy maintenance assignments to full customer satisfaction, we also provide key support that enables our customers to maintain active operations, like Bangladesh Navy's for safeguarding their nation's key resources."
