9 December 2019: RUAG MRO International has completed the 72-month inspection on Bangladesh Navy's (BN) Dornier 228-212 special mission aircraft.

The maintenance, repair and overhaul (MRO) of the Dornier 228 was conducted on time and within budget at the OEM's aircraft production facilities in Oberpfaffenhofen, Germany. The aircraft has now restarted its regular operations.

Bangladesh Navy had taken the delivery of their aircraft at their home base in Dhaka, Bangladesh, on 23 October 2019, immediately following the aircraft's ferry flight from Germany.

"We are pleased to welcome back our Dornier 228 after this successful heavy inspection and have already deployed it to continue our mission of surveillance and patrol flights in the protection of our sovereign waters," said Commodore Zahir, Director Purchase Bangladesh Navy. "We are also proud to welcome back our Oversee Team from their opportunity on the ground at RUAG's production centre,"

"As the Dornier 228 OEM, our expertise includes supporting our customers in every way possible, like this 72-month inspection for Bangladesh Navy. We offer these MRO services with this unique OEM advantage," said Michael Franz, Director Customer Support Dornier 228, RUAG MRO International. He adds, "As we continue to fulfil heavy maintenance assignments to full customer satisfaction, we also provide key support that enables our customers to maintain active operations, like Bangladesh Navy's for safeguarding their nation's key resources."

"Our team of customer support, engineering, and technical specialists apply their thorough Dornier 228 knowledge to offering comprehensive and integrated support services to all Dornier 228 operators," said Volker Wallrodt, Senior Vice President Business Jets, Dornier 228, Military, RUAG MRO International. RUAG MRO International is an EASA approved Part 21J Design Organization (DOA) and, at the same time, is also the Dornier 228 Type Certificate (TC) holder.
