

Equip your Dornier 228 for the iPad Mini – a clipboard mount does double duty

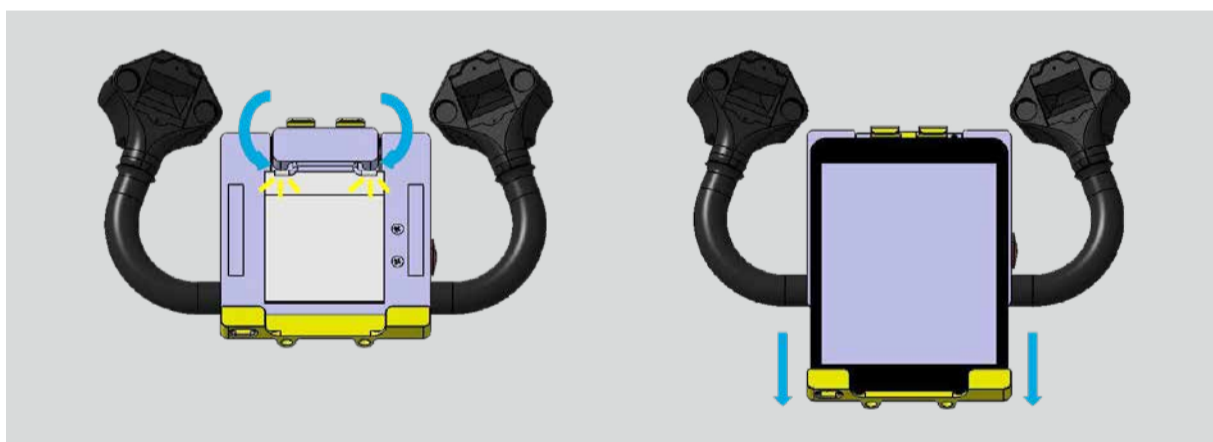

Your iPad Mini now has its own seat in the cockpit of your Dornier 228, flying with a clipboard mount. Convenient and safe, as per request.

You always fly safer in your Dornier 228. Now you have the opportunity to fly even safer and smarter with the added support of our new, dual-purpose iPad Mini mount and clipboard. This hands-free solution adds handheld functionality to the cockpit environment. The convenient and space-saving mount ensures you have all the information you need for secure and efficient operations, right at your fingertips and right when you need it.

Equipped for two-for-one functionality

Your new clipboard does double-duty as an iPad Mini docking station. Combined, you have immediate access to the relevant information necessary for even more effective and efficient operations. Just flip the mount to switch its function – built-in LED lighting supports known clipboard functions and your smart device is ready and available thanks to USB charging.

Engineered and approved by your OEM

The new iPad Mini mount is designed to perform reliably, withstanding demanding operational conditions. We balanced your need for hands-free access to operational information with our proven engineering insights to design, develop and approve this robust and ergonomically sound solution. Your cockpit remains streamlined and secure.

Take flight with your iPad Mini. Contact us to order your cockpit mount today.
